<p>I am very concerned about this development, particularly the effect that it will have on the local woodland and wildlife. As a Scientist I am very aware of the biodiversity crisis that the planet is in, and the UK in particular has already lost many of its native species. This development will fundamentally threaten the small patches of remaining habitat in our local area. I also have concerns about the Skylark & Yellow Hammer which breed locally, and the Schedule 1 species that have been observed in the area but are not currently being taking into account by the application. The development will completely transform a highly valued area of green space in an increasingly built-up landscape, at great loss for the local people. I urge you to reconsider the application and protect the land for wildlife and local communities.</p>
