Subject: Objection to developments 2020/92350 & 2020/92331
Date: 22 November 2022 15:47:29

I write to object about the proposed developments: 2020/92350 & 2020/92331

I am greatly concerned for the health and well-being of local residents, who face the uncertainty and stress of losing the home they have chosen to settle in. The impact of this cannot be measured.

Those who do not lose their home through demolition and continue to live in this area, will have a much reduced quality of life with the loss of this green space area, which provides many scientifically proven benefits to physical and mental health. This can only lead to worsening health and therefore increased demands on already stretched health and social care services, and in the worst case lead to a loss of life. The increase in pollution will also impact health and well-being, leading to pressure on the NHS. Not to me on wildlife ans protected species, which are at risk due to this development. , 7 Battock Road, FK2 0TT.
