---

I am writing to object to the above planning applications for the following reasons:-

- I do not believe the permanent loss of good quality agricultural land is justified when there is other non-agricultural land that could be developed. The need for countries to grow as much of their own food as possible is very important in the current climate and only likely to become more so going forward.
- The negative impact on the natural environment in the area will be significant, both in terms of habitat for birds and animals, and green space for the public.
- Air quality for those people currently living in the area will be adversely affected by both the general increase in traffic volumes and the inevitable queuing traffic at peak times. There will also be a big increase in noise pollution caused by the traffic.

I trust you will give my objections due consideration and conclude that these developments should not proceed.

Regards
