<p>Such a vast development would have a negative impact on traffic in an area which is already hevaliy congested. The traffic survays were carried out at a period of time (covid) where traffic was less than usual.</p> <p>It would be devastating to the existing wildlife and biodiversity in the area that depends of the land.</p> <p>If this development were allowed to go ahead, kirklees would be loosing a green lung, one that not long ago was classified as greenbelt and would have had the protection it deserves. Agricultural land which provides food would be lost, considering the impact of the Ukrainian was on food supplies, to purposely destroy land that feeds us seem preposterous! The impact on ancient woodland would be devastating and irreversible. The proposed protection zone is inadequate to protect the trees and wildlife that depend on surrounding land.</p> <p>Survays carried out have been done so with bias. Suggested surveys, such as ones requested by natural England have been ignored.</p> <p>It would be a loss to the local community.</p>
