<p>For many reasons, it would be highly irresponsible to consider any development in or around this site for development.</p> <p>Not only does the site provide essential habitats for wildlife, it is also an essential environmental buffer to protect against flooding.</p> <p>Throughout the pandemic, this area was a critical lifeline for local people too. It helped with mental health and general wellbeing, as well as providing a social meeting area.</p> <p>Whilst I appreciate, planning considerations run much more deeply than this, the locality is already running beyond saturation levels; traffic, schools and doctors are at constant crisis, the road network is pushed to breaking and considering the world is moving towards decarbonisation, developing on this site would remove natures own carbon capture system.</p> <p>I strongly object to any development on this piece of land, especially considering the over subscription of development locally.</p>
