<p>having walked in this area several times a week this development will have a detrimental effect on wild deer which cross between wooded areas using the fields targeted for development. human activity close by will also stop any chance of the deer breeding and assuring its survival in the area. this amongst other wildlife which will be devastated by the huge development. I also run an Airbnb nearby and a lot of my customers walk the Leeds country way as its an attractive part of the walk. i believe my livelihood will be affected by the reduction of walkers.</p> <p>Also this green space enables many of the local estates to have access to green space as their locality doesn't have any. I notice the plans contain green space for the residents but don't provide for other adjacent locals.</p>
