<p>This land is the only green space available to residents which is significant for mental health and well being, it will mean the destruction of woodland which will be detrimental to many species and biodiversity on a whole. The area is also already heavily congested, traffic surveys were conducted during the first lock down and will not take into account the significant development already being undertaken in this area. This would be the loss of productive farm land and greenspace for future generations. Whilst walking here i have been a wealth of wildlife including woodpeckers this development would remove any significant green space for miles around.</p>
