---

I would like to submit my objections to this planning application on the grounds that this proposal will have a seriously detrimental impact on the environment.

In particular my objections are:

**Impact on education**

Class sizes are too high in the area already. Over 1500 houses will add even more pressure. Our childrens health and education need protecting.

**Impact on climate change:** Woods, fields, streams and fields contribute to climate resilience and act as a cool zone. Changes brought about by this proposal will affect its health and ability to fight climate change

**Impact on Kirklees Wildlife Habitat Network** loss of local Wildlife site and ancient woodland and important wildlife species, specifically Skylark & Yellow Hammer which breed on the land in large numbers. The Ecological Impact Assessment states: "with a development site of this scale, some impacts remain significant, and are very hard to mitigate".

– Years out-of-date Ecological Surveys which have been 'updated' by one single walk-over by an Ecologist (employed by Land Owner) in October 2022 after a drought.

**Impact on the local transport infrastructure**

Our roads are busy enough as it is. An additional 2000 cars and lorries per day will be too much. Even the Highways Agency think so.

Would you kindly make sure that my objection is listed on the planning portal

regards
