Appendix 1 – Plan 1

Appendix 2 – Planning Permission

Conditions and reasons:

1. Prior to the commencement of development (save for enabling works which for the purposes of this condition shall comprise site preparation, remediation works, provision of construction and temporary access roads, diversion and/or laying of strategic site-wide utilities, and works associated with archaeological surveys) of any phase or sub phase of the development hereby approved, details of appearance, landscaping, layout and scale (hereinafter called the “Reserved Matters”) of that phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority. For the purposes of this permission, all references to a “phase” or “phase of development” shall be interpreted as being a reference to a phase as defined on a phasing plan to be submitted pursuant to outline condition 5 below and all references to a “sub phase” are to be a part or component of such a phase as defined in an application submitted pursuant to a condition of this permission. A standalone Reserved Matters application relating only to infrastructure may be made to the Local Planning Authority.

Reason: No details of the matters referred to having been submitted, they are reserved for the subsequent approval in writing of the Local Planning Authority. This is a pre-commencement condition to ensure that sufficient detail is provided and agreed at an appropriate stage of the development process.

2. The development hereby approved shall be implemented within the Site as defined by the Site Location Plan (00-501 rev B) in accordance with the Parameter Plan (00-211 rev C) and in accordance with the plans and particulars of the Reserved Matters referred to in outline condition 1 above, except as may be specified in the conditions attached to this permission or attached to future approvals of Reserved Matters, which shall in all cases take precedence.

Reason: For the avoidance of doubt as to what is being permitted and in the interests of visual amenity, residential amenity and other matters relevant to planning and to accord with the Kirklees Local Plan and the National Planning Policy Framework.

3. The first Reserved Matters application relating to the development hereby approved shall be made to the Local Planning Authority before the expiration of three years from the date of this permission. All applications for the approval of Reserved Matters for the development hereby approved shall be made to the Local Planning Authority before the expiration of five years from the date of this permission.

Reason: Pursuant to section 92 of the Town and Country Planning Act 1990, as amended by the Planning and Compulsory Purchase Act 2004.

4. Implementation of the first phase or sub phase of the development hereby approved shall commence either before the expiration of two years from the final approval of Reserved Matters relating to that phase or sub phase or in the case of approvals of different dates, the final approval of the last such matter to be approved. Subsequent phases or sub phases of development shall be begun no later than:

- a) Seven years beginning with the date of the grant of this outline planning permission; or
- b) if later than a) above, two years from the final approval of the Reserved Matters for the relevant phase or sub phase or, in the case of approval on different dates, the final approval of the last such matter to be approved.

Reason: Pursuant to section 92 of the Town and Country Planning Act 1990, as amended by the Planning and Compulsory Purchase Act 2004.

5. If the development hereby approved is to be delivered in phases, prior to or contemporaneously with the submission of the first application for the approval of Reserved Matters, a plan showing the phases of the development hereby approved shall be submitted to and approved in writing by the Local Planning Authority. The development shall thereafter be implemented in accordance with the approved phasing plan, unless an amended phasing plan is submitted to and approved in writing by the Local Planning Authority.

Reason: To define the scope of this permission and to provide clarity in relation to the progression of development across the site.

6. Prior to the commencement of development (including ground works) of any phase or sub phase of the development hereby approved, a Construction (Environmental) Management Plan (C(E)MP) for that phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority. The C(E)MP shall include a timetable of all works, and details of:

- Hours of works (including times of deliveries);
- Point(s) of access and routes for construction traffic (which shall avoid Chidswell Lane);
- Construction vehicle sizes;
- Numbers and times of construction vehicle movements;
- Locations of HGV waiting areas and details of their management;
- Parking for construction workers;
- Loading and unloading of plant and materials;
- Storage of plant and materials;
- Signage;
- Measures to be taken to minimise the deposit of mud, grit and dirt on public highways by vehicles travelling to and from the site, including the provision of adequate wheel washing facilities within the site;
- Street sweeping;
- Measures to control and monitor the emission of dust and dirt during construction;
- Site waste management, including details of recycling/disposing of waste resulting from construction works;
- Mitigation of noise and vibration arising from all construction-related activities;
- Artificial lighting used in connection with all construction-related activities and security of the construction site;
- Site manager and resident liaison officer contacts, including details of their remit and responsibilities;
- Engagement with local residents and occupants or their representatives; and
- Engagement with the developers of nearby sites to agree any additional measures required in relation to cumulative impacts (should construction be carried out at nearby sites during the same period).

The development hereby approved shall be carried out strictly in accordance with the C(E)MP so approved throughout the period of construction and no change therefrom shall take place without the prior written consent of the Local Planning Authority.

Reason: In the interests of amenity, to ensure the highway is not obstructed, in the interests of highway safety, to ensure harm to biodiversity is avoided, and to accord with Policies LP21, LP24, LP30 and LP52 of the Kirklees Local Plan.

This pre-commencement condition is necessary to ensure measures to avoid obstruction to the wider highway network, to avoid increased risks to highway safety, and to prevent or minimise amenity and biodiversity impacts are devised and agreed at an appropriate stage of the development process.

7. Prior to the commencement of development (including ground works) of any phase or sub phase, a survey of the existing condition of the highway (the extent of highway to be surveyed to be agreed in writing by the Local Planning Authority in advance, but limited to the highways shown in drawing A13398-T-063 rev B) shall be carried out jointly with the Local Highway Authority and submitted to and approved in writing by the Local Planning Authority. The survey shall include carriageway and footway surfacing, verges, kerbs, edgings, street lighting, signing and white lining. Upon completion of the relevant phase or sub phase of the development hereby approved (or at any earlier stage to be agreed with the Local Planning Authority in advance) a post-construction survey of the agreed extent of highway shall be carried out and the post-construction survey and a scheme of remedial works shall be submitted to and approved in writing by the Local Planning Authority. The approved remedial works shall be carried out prior to the occupation of no more than 90% of the dwellings of the relevant phase or sub phase of the development hereby approved unless otherwise agreed in writing by the Local Planning Authority. Should any highways defects (affecting highway safety) attributable to the construction traffic of the relevant phase or sub phase of the development hereby approved be identified during the construction period, remediation of these shall also be implemented in accordance with details to be submitted to and approved in writing by the Local Planning Authority.

Reason: In the interests of highway safety, to ensure the effective maintenance of the highway and to accord with Policy LP21 of the Kirklees Local Plan.

This pre-commencement condition is necessary to ensure highways surrounding the site are appropriately surveyed prior to works commencing, and to ensure responsibility for remedial works can be fairly assigned with reference to evidence.

8. Prior to the commencement of development (including ground works) of any phase or sub phase of the development hereby approved, a scheme detailing temporary surface water drainage for that phase or sub phase (after soil and vegetation strip) shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall:

- Detail phasing of the development and phasing of temporary drainage provision (if known);
- Include details of any excavation or levelling that may be required prior to or as part of the implementation of temporary drainage works;
- Include methods of preventing silt, debris and contaminants entering existing drainage systems and watercourses and details of how flooding of adjacent land would be prevented; and

- Include methods of preventing contamination of watercourses once the new drainage has been installed.

The temporary works shall be implemented in accordance with the approved scheme and phasing. No phase or sub phase of the development shall be commenced until the temporary works approved for that phase or sub phase have been completed. The approved temporary drainage scheme shall be retained until the approved permanent surface water drainage system is in place and functioning in accordance with written notification to the Local Planning Authority.

Reason: To ensure the risk of flooding does not increase during the construction phase, to limit the siltation of any on- or off-site surface water features, and to accord with Policy LP27 of the Kirklees Local Plan.

This pre-commencement condition is necessary to ensure measures to avoid increased flood risk are devised and agreed at an appropriate stage of the development process.

9. Prior to the commencement of development (including ground works and enabling works) of any phase or sub phase of the development hereby approved, a Tree Protection Plan shall be submitted to and approved in writing by the Local Planning Authority for that phase or sub phase. The Tree Protection Plan shall include protection measures relating to any trees (that are to be retained) located along construction traffic routes to/from the relevant phase or sub phase. The development shall be carried out in accordance with the documents so approved.

Reason: To protect trees in the interests of visual amenity and biodiversity and to accord with Policy LP33 of the Kirklees Local Plan.

This pre-commencement condition is necessary to ensure that details of tree protection are agreed at an appropriate stage of the development process.

10. Prior to the commencement of development (including ground works and enabling works) of any phase or sub phase of the development hereby approved within 500m of Dum Wood, an Ancient Woodland Protection Plan shall be submitted to and approved in writing by the Local Planning Authority. The Ancient Woodland Protection Plan shall include measures to protect Dum Wood from dust, light, surface water run-off, noise and other pollution throughout the period of construction. The development hereby approved shall be carried out strictly in accordance with the Ancient Woodland Protection Plan so approved throughout the period of construction and no change therefrom shall take place without the prior written consent of the Local Planning Authority.

Reason: To protect ancient woodlands in the interests of visual amenity and biodiversity and to accord with Policy LP33 of the Kirklees Local Plan.

This pre-commencement condition is necessary to ensure that details of ancient woodland protection are agreed at an appropriate stage of the development process.

11. Prior to the commencement of development (including ground works) of any phase or sub phase of the development hereby approved, a written scheme of archaeological investigation (WSI) for the phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority. For land that is included within the WSI, no development shall take place other than in accordance with the agreed WSI, which shall include:

- A statement of significance and research objectives;

- A programme and methodology of site investigation and recording and the nomination of (a) competent person(s) or organisation to undertake the agreed works; and
- A programme for post-investigation assessment and subsequent analysis, publication and dissemination and deposition of resulting material. This part of the condition shall not be discharged until these elements have been fulfilled in accordance with the programme set out in the WSI.

Reason: To ensure buried heritage assets are appropriately recorded and protected and to accord with policy LP35 of the Kirklees Local Plan and chapter 16 of the National Planning Policy Framework.

This pre-commencement condition is necessary as intrusive works on site have the potential to damage or disturb buried heritage assets.

12. Means of access to and from the site shall be consistent with the principles illustrated in drawing A13398-T-002 rev E and shall be provided prior to first occupation of the development and thereafter retained and maintained for the lifetime of the development.

Reason: To ensure suitable access is provided, in the interests of highway safety and amenity, to achieve a satisfactory layout, and to accord with Policies LP20, LP21, LP24 and LP67 of the Kirklees Local Plan and the National Planning Policy Framework.

13. Unless it is approved under a condition of planning permission ref: 2020/92331 (should that permission be granted) that a district energy network will not be provided under that permission, each relevant application for the approval of Reserved Matters shall include details (including road layout plans and sections) demonstrating how the development hereby approved shall be capable of accommodating pipework of a district energy network.

Reason: To ensure the development's housing is capable of being connected to a district energy network in the event that a local decentralised energy scheme is to be implemented, and to accord with Policy LP26 of the Kirklees Local Plan and the National Planning Policy Framework.

14. Each application for the approval of Reserved Matters shall include a noise assessment which shall specify the measures to be taken to protect the new residential units and curtilages from noise from all significant noise sources (including noise from road traffic, commercial uses and community uses) and shall:

- Determine the existing noise climate;
- Predict the noise climate in living rooms and gardens (daytime), bedrooms (night time) and other habitable rooms of the development; and
- Detail the attenuation/design necessary to protect the amenity of the occupants of the new residences (including ventilation if required).

Prior to the first occupation of any dwelling to which the relevant Reserved Matters application relates, all works specified for that dwelling in the approved noise assessment shall be carried out in full and such works shall thereafter be retained.

Reason: In the interests of amenity and to accord with Policies LP24 and LP52 of the Kirklees Local Plan and the National Planning Policy Framework.

15. Prior to the commencement of development (save for enabling works which for the purposes of this condition shall comprise site preparation and site investigation)

of any phase or sub phase of the development hereby approved, a Phase II Intrusive Site Investigation Report for that phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure unacceptable risks to human health and the environment are identified, and to ensure that the development is safely completed in accordance with the requirements of Policy LP53 of the Kirklees Local Plan and the National Planning Policy Framework.

This pre-commencement condition is necessary to ensure that contamination is identified at an appropriate stage of the development process.

16. Where site remediation is recommended in the Phase II Intrusive Site Investigation Report approved pursuant to condition 15 above, a Remediation Strategy for that phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of development for that phase or sub phase. The Remediation Strategy shall include a timetable for the implementation and completion of the approved remediation measures.

Reason: To ensure unacceptable risks to human health and the environment are identified and removed, and to ensure that the development is safely completed in accordance with the requirements of Policy LP53 of the Kirklees Local Plan and the National Planning Policy Framework.

This pre-commencement condition is necessary to ensure that contamination is identified and suitable remediation measures are agreed at an appropriate stage of the development process.

17. Remediation of the site (which can include remediation on a phase or sub phase basis) shall be carried out and completed in accordance with the Remediation Strategy approved pursuant to outline condition 16 above. In the event that remediation is unable to proceed in accordance with the approved Remediation Strategy or contamination not previously considered is identified or encountered on site, all works in the affected area (other than site investigation works) shall cease immediately and the Local Planning Authority shall be notified in writing within two working days. Unless otherwise agreed in writing with the Local Planning Authority, works in the affected area shall not recommence until proposed revisions to the Remediation Strategy have been submitted to and approved in writing by the Local Planning Authority. Remediation of the site shall thereafter be carried out in accordance with the approved revised Remediation Strategy.

Reason: To ensure unacceptable risks to human health and the environment are identified and removed, and to ensure that the development is safely completed in accordance with the requirements of Policy LP53 of the Kirklees Local Plan and the National Planning Policy Framework.

18. Following completion of any measures identified in the approved Remediation Strategy or any approved revised Remediation Strategy, a Validation Report relating to that phase or sub phase shall be submitted to the Local Planning Authority. Unless otherwise agreed in writing with the Local Planning Authority, no part of that phase or sub phase shall be brought into use until such time as the remediation measures for that phase or sub phase have been completed in accordance with the approved Remediation Strategy or the approved revised Remediation Strategy and a Validation Report in respect of those remediation measures has been approved in writing by the Local Planning Authority. Where validation has been submitted and

approved in stages for different phases and/or sub phases of the whole site, a Final Validation Summary Report shall be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure unacceptable risks to human health and the environment are identified and removed, and to ensure that the development is safely completed in accordance with the requirements of Policy LP53 of the Kirklees Local Plan and the National Planning Policy Framework.

19. Prior to or contemporaneously with the submission of the first application for the approval of Reserved Matters relating to a phase or sub phase of the development hereby approved, the findings of a scheme of intrusive investigations carried out on site to establish the risks posed to that phase or sub phase of the development hereby approved by past coal mining activity shall be submitted to and approved in writing by the Local Planning Authority. Should any remediation works and/or mitigation measures to address land instability arising from coal mining legacy prove necessary in light of the findings of the intrusive investigations, details of the these works and/or measures (which may include designation of zones of influence of mine entries, the definition of no-build zones, the capping or other treatment of mine entries and/or remedial works related to shallow coal workings) shall be submitted to and approved in writing by the Local Planning Authority, and these works and/or measures shall be implemented on a phase by phase basis prior to the commencement of any development of the relevant phase or sub phase (including ground works, other than those required as part of the approved remediation works). Proposals submitted under the accompanying and subsequent Reserved Matters applications shall adhere to the findings of the approved assessment and the approved remediation works and/or mitigation measures.

Reason: To enable assessment and minimisation of the risks associated with the area's mining legacy in accordance with Policy LP53 of the Kirklees Local Plan. This pre-commencement condition is necessary to ensure that details of remedial and/or mitigatory measures related to the site's coal mining legacy are agreed at an appropriate stage of the development process.

20. Prior to any phase or sub phase of the development hereby approved being brought into first use, in respect of which works were required pursuant to condition 19, a validation statement/declaration related to coal mining legacy affecting that phase or sub phase shall be submitted to and approved in writing by the Local Planning Authority. The statement/declaration shall be prepared and signed by a suitably competent person, shall confirm that the phase or sub phase is, or has been made, safe and stable for the phase or sub phase of the development hereby approved, and shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.

Reason: To minimise risk associated with the area's mining legacy in accordance with Policy LP53 of the Kirklees Local Plan.

21. If the development hereby approved is to be delivered in phases, prior to or contemporaneously with the submission of the first application for the approval of Reserved Matters, a site-wide foul and surface water and land drainage strategy shall be submitted to and approved in writing by the Local Planning Authority in consultation with the Lead Local Flood Authority. The strategy shall set out the

overarching principles and parameters (including in relation to the co-ordination and integration of drainage across phases and sub phases within the development hereby approved) which shall inform detailed proposals subsequently devised for specific phases and sub phases of the development hereby approved.

Reason: To ensure the effective disposal of foul and surface water from the development so as to avoid an increase in flood risk and to accord with Policies LP27 and LP28 of the Kirklees Local Plan and chapter 14 of the National Planning Policy Framework.

22. Prior to or contemporaneously with the submission of the first application for the approval of Reserved Matters relating to each phase or sub phase, a scheme detailing foul and surface water and land drainage for that phase or sub phase (including off site works, outfalls, balancing works with discharge rates approved in writing by the Local Planning Authority in consultation with the Lead Local Flood Authority, plans and longitudinal sections, hydraulic calculations, details of phasing of drainage provision, details of existing drainage to be maintained / diverted / abandoned, and details of water quality improvements) shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall adhere to the overarching principles and parameters of the strategy approved pursuant to condition 21. No part of that phase or sub phase of the development hereby approved shall be occupied until the drainage scheme so approved for that phase or sub phase has been implemented.

Reason: To ensure the effective disposal of foul and surface water from the development so as to avoid an increase in flood risk and to accord with Policies LP27 and LP28 of the Kirklees Local Plan and chapter 14 of the National Planning Policy Framework.

23. Prior to or contemporaneously with the submission of an application for the approval of Reserved Matters relating to each phase or sub phase, an assessment of the effects of 1 in 100 year storm events, with an additional allowance for climate change, exceedance events and blockage scenarios, on drainage infrastructure and surface water run-off pre- and post-development between the relevant phase or sub phase of the development hereby approved and the surrounding area shall be submitted to and approved in writing by the Local Planning Authority. No part of the relevant phase or sub phase of the development hereby approved shall be brought into first use until the works comprising the approved scheme (avoiding property and curtilage) have been completed and the approved scheme shall be retained thereafter.

Reason: To ensure the effective disposal of surface water from the development so as to avoid an increase in flood risk and to accord with Policies LP27 and LP28 of the Kirklees Local Plan and chapter 14 of the National Planning Policy Framework.

24. Each application for the approval of Reserved Matters shall include details of faunal enhancement measures (together with arrangements for their maintenance and management) informed by up-to-date and comprehensive ecological surveys (including surveys of protected species) prepared and submitted by the developer. Following approval in writing by the Local Planning Authority, the measures (which may include the provision of bird and boxes, and provisions relating to hedgehogs and badgers) shall be implemented on a phase-by-phase basis in accordance with the details so approved. No phase or sub phase of the development hereby

approved shall be first occupied prior to the implementation of the faunal enhancement measures so approved for that phase or sub phase, unless the approved details include alternative proposals for the timing of installation of the measures (in which case those alternative proposals shall be complied with). The measures shall be maintained and managed in accordance with the approved details for a minimum period of 30 years thereafter.

Reason: To secure mitigation, enhancement and compensation for the ecological effects resulting from loss of habitat and to accord with policy LP30 of the Kirklees Local Plan and chapter 15 of the National Planning Policy Framework.

25. No removal of hedgerows, trees or shrubs shall take place between 1st March and 31st August inclusive, unless authorised in writing by the Local Planning Authority in response to evidence to be submitted in writing to the Local Planning Authority demonstrating that no birds will be harmed and/or that there are appropriate measures in place to protect nesting bird interest on site.

Reason: To prevent significant ecological harm to birds, their eggs, nests and young and to accord with Policy LP30 of the Kirklees Local Plan and chapter 15 of the National Planning Policy Framework.

26. Each application for the approval of Reserved Matters relating to residential use shall include floor plans (providing details of internal layouts of the residential accommodation) and a schedule of accommodation (providing unit size mix information and gross internal floorspace figures in sqm) for all residential units.

Reason: To enable the quality, amenities and housing mix of the residential accommodation to be assessed in accordance with policies LP11 and LP24 of the Kirklees Local Plan and chapter 5 of the National Planning Policy Framework.

For the avoidance of doubt, the following terms (used in the above conditions) are defined as follows:

Site preparation comprises the installation of temporary facilities, installation of Heras or other fencing, installation of temporary construction compounds, and removal of existing structures and vegetation. Site preparation does not include ground works which are defined as excavation, remediation, grading and other activities related to the modification of the ground surface or subsurface.

Strategic site-wide utilities comprise the diversion of existing utilities or laying of new utilities which serve the entirety of the site or multiple phases.

Sub phase means a part or a component of a phase.

The above definitions shall be regarded as forming part of the wordings of the above conditions.

Informatives

NOTE: The granting of planning permission does not authorise the carrying out of works within the highway, for which the written permission of the Local Highway Authority is required.

You are required to consult the Local Highway Authority Design Engineer (Kirklees Street Scene: 01484 221000) at the earliest opportunity in the development process to obtain approval of the design details, agree the mechanism for delivery, and obtain the necessary permissions / permits to enable the delivery of the site access(es).

This process will involve entering into a Section 38 or 278 agreement of the Highways Act 1980 or other appropriate agreement to enable delivery of the works. The applicant is advised to make early contact with the Local Highway Authority Design Engineer, to ensure that the delivery of the works does not delay occupation of the development.

Please also note that the construction of vehicle crossings within the highway is deemed to be major works for the purposes of the New Roads and Street Works Act 1991 (Sections 84 and 85). Interference with the highway without such permission is an offence which could lead to prosecution.

Bus Stop Infrastructure Audit:
Summary of Existing Infrastructure
and Proposed Improvements

Revised Final Issue (F02) – 24 January 2024

A bus stop infrastructure audit was carried out on Tuesday 26 September 2023, attended by Pell Frischmann (on behalf of CC Projects), Kirklees Council (KC) Planning and Highways officers, and West Yorkshire Combined Authority (WYCA).

This document sets out the existing and proposed infrastructure at each of the 23 bus stops as agreed to be included within the scope, as discussed during the audit. It also considers an additional bus stop, on Chidswell Lane ('Bus Stop 15a'), that was raised by KC and WYCA as needing relocation and new infrastructure following the audit.

Pell Frischmann has subsequently identified high-level estimated costs for the provision of the proposed new infrastructure at all 24 bus stops, based on professional experience and understood assumed typical industry-standard costs.

It is agreed in-principle that infrastructure delivery should be tied to the nearest development parcels / phases within the proposed development sites.

It is also predicted that this will be an important stop for bus by parents and children travelling to and from the proposed new primary school within the proposed development site. Positioned at the front of footway (at edge of kerb), as agreed on-site, so the stop is not an obstruction to pedestrians passing.
