The continued suggested and repeated planning applications fail to consider the natural habitat and wildlife that we are fortunate to have in this area. It has been highlighted and evidenced that the area has seen endangered thought to be distinct wildlife, yet applications continue. Aside from the blatant disregard of natural beauty that we are fortunate to have on our doorstep that myself and countless others enjoy. The area is subjected to steamroll continued plans, the church and council do not represent the views of the area as if they would, this would not be in question. There is a lack of disregard for benefits mentioned and highlight greed, regenerate areas that are in need of redevelopment. The socio and economic benefits of suggested plans lack any real substance against a backdrop of disbelief. The socio and economic benefits do not and will never stack up as the evidence is not there.
