**Subject:** 2020/60/92350/E objection

Dear Sir/Madam,

I am writing to register my formal objection to the above planning application concerning the proposed construction of dwellings on land currently designated for agricultural use and valued green space within our community.

This site represents far more than open land; it is an essential green lung for our town. Residents regularly use the area for walking, recreation, and connecting with nature. The proposed development would irreversibly damage a landscape that plays a vital role in the wellbeing of both individuals and the wider community.

The ecological value of the site cannot be overstated. It provides habitat for a diverse range of wildlife, including protected species such as otters, bats, woodpeckers, and red kites. The loss or disruption of this environment would place these species at serious risk and run contrary to both national and local policies on biodiversity protection and environmental stewardship.

Furthermore, the surrounding road network is already at breaking point. Traffic congestion continues to worsen, creating longer journey times, increased air pollution, and reduced pedestrian safety. Introducing additional housing and vehicle use without substantial infrastructure improvements would only intensify these problems.

For these environmental, ecological, and infrastructural reasons, I strongly urge the planning committee to reject this application. The long-term costs to our community and natural environment far outweigh any perceived short-term benefits.

Thank you for your careful consideration of my objection.

Yours faithfully,

WF5 9QU
