Dear Sir/ Madam,

OBJECTION- Heybeck

I wish to strongly object to the Heybeck Permission for planning and request that this be brought back to a **Strategic Planning Committee**.

I am a keen conservationist and care deeply about the natural habitats that have been formed over hundreds of years and which support a fragile and important eco system- systems which impact both local nature and wildlife but also our country as a whole if these types of developments are not kept in check and scrutinised. These habitats can not be simply offset by other sites, they are biodiverse and are valuable and irreplaceable to the land that they have been formed within.

Whilst this matters greatly to me personally, the responsibility to the countryside should weigh heavily on the people and organisations who are trusted to make these decisions- namely, yourselves.

I leave this email hopeful that you will consider this objection and any others with their seriousness and levity that they require.

Kind regards,
