Subject: 2020/60/92350/E Objection

>> My Postcode WF12 7SH No 41

>> Application 2020/60/92350/E

>> Dear Sir /Madam

>> I strongly object to the 106 agreement proposals. It appears that following the judicial review judgement to overturn an outline Planning application for the Heybeck site the council feels it can easily satisfy the requirements which were not satisfied previously, also it appears that this can be done without a full council approval! The Planning Department instead of ignoring the wishes of local people should get its act together and consider what the local community require and want!

>> This application needs to be brought before the Strategic Planning Committee.

>> Dum and Dogloitch Ancient Woodlands are not appropriate sites to offset damage caused by the development. They are currently established ancient woodland sites which could not in any way be improved by any proposed diverse scheme, in fact quite the opposite!

>> Currently Kirklees initiatives are to provide a suitable green space locally for all its residents but in this instance they are intent on removing all the local green space of Chidswell and the surrounding areas for development turning an urban area in to an over populated new village, in reality, they will not be not providing any extra provision of infrastructure and the needs of such a population for health, education and transport which is already under pressure!

>> Kirklees is such a large area where other development sites within it would be more appropriate, but this council is apparently intent on being led by a land owner whose only interest is in profit and gain! A very concerned resident having lived in this area for the past 71+years!

>> Yours faithfully
