**Subject:** Planning reference is: 2020/60/92350/E Land south of, Heybeck Lane, Chidswell, Shaw Cross, Dewsbury.

I would like to raise my continued objection to the above development. The damage that will be done to the Dum and Dogloitch ancient woodlands was already going to be significant but suggesting they can be used to offset damage is a disgrace. If you've ever visited a woodland near an industrial site or housing estate you will be aware of the increase littering and destruction caused to the woodland flora and fauna. If anything further protection should be given to this land by reducing the housing/industrial land proposed and increasing the borders between the woodland and the development to help minimise impact. We've all seen far too many instances of developers "accidentally" knocking over trees and damaging hedgerows. This application should be brought before the Strategic Planning Committee. Further evasion of due democratic process continues to show the contempt the council has for voters and will not be forgotten when elections come around.
