RE: Formal Objection to Proposed Development.

I wish to strongly object to this proposed development on behalf of the community who have made their views abundantly clear. This site has been overwhelmingly rejected by local residents who continue to stand for what is right for our area and our environment.

This development is entirely inappropriate for this location. It threatens vital wildlife habitats within the green belt, including those of owls, deer, and protected species such as newts. The loss of this woodland and open landscape would devastate local biodiversity and displace countless animals that depend on it.

Beyond the environmental damage, this land provides an invaluable space for people, a place for walking, picnics, wellbeing, and connection with nature. It contributes significantly to the community's mental health and quality of life. Destroying it for development would be a profound and irreversible loss.

The community has submitted numerous well-reasoned objections highlighting environmental, social, and planning concerns. It is deeply disappointing that Kirklees Council has so far failed to fully acknowledge or address these legitimate points. Ignoring the collective voice of the community in favour of short-term development interests is unacceptable and erodes public trust in the planning process.

We urge you to reconsider and refuse this application. Please protect our environment, our green spaces, and our future generations' right to clean air and natural landscapes. This land is not a development site.
