I object to the full planning application!! My husband and I live in a bungalow. On the plans of the application they intend to build houses directly behind our south facing bungalow. We paid over £10,000.00 for solar panels. To have the winter sun blocked out will make the solar panels non existent in winter.

The biggest impact will be on the wildlife and the Quality of air that is already chocked by the amount of traffic. Just over my back wall we see the pheasants every day.

When the farmer plants his crops there was over 55 pheasants feeding on there. they live in the bushes just over our wall which will be destroyed straight away if this insane planning is given the go ahead!

The amount of wildlife is in abundance on this sight! Red Kite, Buzzards, Roe Deer, Rabbits, Kingfisher, Bats, Owls, to name but a few. Chidswell action group have a full list of the wildlife that live among us on the land. We can all see the wildlife everyday, where are they supposed to go??

The damage that this planning application if passed will cause on the local people and the climate will be irreversible! Heybeck lane and Leeds Rd is chocked with traffic early morning with the school run and work traffic. Any problems on the motorway impacts the roads greatly, then we have the evening traffic to contend with which goes on from 3pm to at least 7pm.

Then we have the Schools, Gp services, Dental services to provide for more people. We all struggle to get appointments now, it will be even worse if these plans are passed.

Kirklees Council are supposed to be climate aware? I will struggle to believe that if these plans are passed! This land is needed. It is farmland. In this current crisis in the world why would the Church of England and Kirklees Council even consider using Farmland to build on?? If it's for the money then that is criminal!!

We implore you to throw these plans out!

The amount of empty properties in Kirklees is shameful. The private sector are causing more poverty, but these same families cannot afford these houses, they are unaffordable houses.

This is going to cause irreversable damage. I would appreciate a site visit from your planning inspector to come and see what impact this will have on all our quality of life, but more so for the wildlife that will suffer the most!

We need each other to exist on this planet. Every bad plan is a nail in the coffin for us all!!!!
