What is the application for?:	Outline application for residential development (Use Class C3) of up to 181 dwel
Address of the site or building:	Land south of, Heybeck Lane, Chidswell, Shaw Cross, Dewsbury
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
I wish to object to the loss of ancient land which will have a catastrophic effect on the area's wildlife and ecosystem. We have lost so much to development, we now need to preserve what remains for our children's futures and ours. The noise and disruption already caused by development in the area is endless, the pollution can be smelt in the air and the constant traffic in and out of worksites is only a foreshadowing of what is to come. We cannot cope with any more, our doctors and schools are at breaking point and the last bits of open land left for our access are being lost. Small alleys and paths cannot make up for open land, the physical and mental wellbeing of many a resident depends on that land. The lives of our native species which we are driving out depend on that land. I have regularly seen hedgehogs and moles, species which we are going to lose if this continues. It shouldn't be a decision based on money, there are other brown field sites that are ready for development yet they stand empty. Why? Because of money. That's the only reason. We all need to play our part in protecting the environment and seeing that our children have a future in a place with open land and a way of getting away from the constant pollution and heavy traffic we are becoming all too used to. Please when considering the objections consider them without money in mind, if our area could buy the land to keep it safe we would be unfortunately time and time again we are bulldozed over by developments. We have fought so long to protect what we can, on this site and many others in the area, and time and time again they are taken away from us. Please, let me be able to take my grandchildren to see the kestrels, hear the woodpeckers, ride their bikes without fear of cars and pollution. This area means the world to us, we're surviving on one lung. Let this one continue to keep us safe.
