A development of this land will result in the loss of agricultural land. It will also leave birds such as the skylark and yellow hammer without homes. We regularly walk the woods and surrounding areas and see lots of other wildlife which would be disrupted along with thousands of bats which we regularly see and hear. The Woods, fields, streams and fields contribute to climate resilience and act as a cool zone which will affect our ability to fight climate change if the plans went ahead. The beautiful green barrier which helps separate land from Leeds, Wakefield and Kirklees would be no more.
