I've seen many planning applications and am horrified that this has been allowed to progress as far as it has considering the level of environmental and ecological harm that would be caused. It seems officers are not aware of the recent study published in July 2021 that showed the majority of mitigation proposals on planning applications are not based on any real works evidence. This should be very concerning to you. My father is a construction and housing expert building over 9,000 homes in his 40+ year career and he is also against this blatant disregard of protected species. This will effect the ancient woodland and that it unacceptable. We are facing a climate crisis. Please do your part in helping our planet by refusing this application.
