Kirklees Council Planning Department

Dear Sir or Madam,

Planning application reference 2020/92350

I refer to the aforementioned planning application and strongly object against it for several reasons, principally;

1. The wholesale and wanton destruction of Green Belt land, which currently offers the space for Wildlife habitats and the opportunity for residents, local and other, for peaceful recreation. In my view concerted effort should instead be given to the redevelopment of the numerous Brownfield sites throughout the Kirklees District.
2. The vastly increased levels of Traffic which will be inflicted on Residents, due to the scale of the development. As a local resident of many years standing I can honestly say there has never been a greater level of Traffic congestion as there is now, and the planned development will only severely exacerbate the problem. Should you care to witness the Traffic on the A653 you will note this is already at saturation point, due to the current ongoing developments at Shaw Cross and Owl Lane and the Noise and Air pollution arising is absolutely horrendous.

Yours faithfully
