Type of comment: An objection	
This planned extension will block most of the natural daylight coming into , which is where we spend most of our time We have a house right next to our garden fence which already blocks a lot of light entering our house and a to the which does the same, if this extension goes ahead we will have and very little natural light entering the property. As the sun rises over 22 this extension will also block the sunlight coming into our house and the garden. most of the time so this proposed extension will have a big impact on health and wellbeing if it goes ahead.
