Previous applications for this site have been refused because of the dangerous access from the site. This application states that no accidents have occurred, but over the last 13 years the house has largely remained unoccupied, with the exception of two separate occupiers who infrequently used a car. Living next to the site we have to exercise extreme care when emerging onto the road, a persistent and ongoing annoyance is cars traveling in excess of the speed limit in both directions in front of the site. Which has increased over the years with a growing volume of traffic The terrace of houses 5,7,and 9 Scar End whilst not listed are a perfect example of the local vernacular architecture, the detriment to the character of the area with the addition of an out of character modern build house built adjacent would be of obvious significance.
