User comments

Type of comment: An objection	
I object to the extension that has been put in for approval The already existing extension blocks out so much light from Both the and do not get any light and therefore is always dark and cold. To build onto the already existing extension would block out not only the only bit of light but the view from the as all i would see would be The that is in shade from the existing extension takes time to dry out in bad weather, to have that extension would shade even more which in time could cause damp I hope my concerns are heard.
