Good afternoon I have just received a email regarding the application of a single story errection on the back of 79 Yew tree Road. HD3 3QR. I have already put my concerns forward about this extension being done due to the lack of lighting already with the first extension on the house. The walls to the back of my house do not dry and most of my back garden is in shade due to the already done extension. If there was to be another extension then this would block out all the light into my kitchen and back bedroom as well as putting most of my garden into the shade. I hope my concerns are heard and I am kept in the loop with what decision is made
