Good morning,

I write further to my email a couple of weeks ago regarding the above planning application.

I would also like to add the following to my concerns.

- Access to the property. This would be for both hgv and additional vehicles. As the proposed site is at the end of a cul de sac with a narrow drive, and a street on which traffic is parked for school collection, I would be concerned about access and also about blocking access to our drive.

- The increased number of vehicles passing our house, in effect changing our house from being the end of the cul de sac to building a road going past it for additional cars to access. Our street is a family street with children playing out and this would increase the danger to them.

- The loss of trees in the property. The current owners have already destroyed shrubs and trees, and I am concerned about the environmental impact
