Type of comment: An objection
I wish to object to the recent application for gate posts and gates which have been built prior to an application being submitted and approved/declined. My objection is on the grounds of conservation within the local area. These gate posts are larger than any in the area in both height and width. The gates are not made of natural materials and are more in keeping in height and size of those found on an industrial estate! We are a residential area. I have no objection to an owner wanting to erect a fence, gate posts and electric gates around his property but not to this height and scale. The width of the gates makes them slow to open ensuring other residents on the lane have to wait! For these reasons I would call on the planning committee to refuse this application and work with the owner to reduce the width of his entrance which was refused on previous applications and return the entrance to a more suitable size and in keeping with the residential area and to erect electric gates of a reasonable height as per Kirklees Council guidelines.
