| <b>Outline application for erection of residential development</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                               |                                         |
| <b>Date Responded:<br/>03 December 2020</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>Responding Officer:<br/>Mohammed Nasim</b> | <b>Responding Ref:<br/>WK/202031173</b> |
| <p><b><u>Comments</u></b></p> <p>The applicant has submitted a Design &amp; Access statement authored by Acumen Designers &amp; Architects dated October 2020 Ref 2677 for a large single dwelling sited between existing residential properties.</p> <p>The applicant will need to consider the disposal of foul waste. This needs to be addressed before the application is determined.</p> <p>In an application of this nature it is expected that facilities for charging electric vehicles and other ultra-low emission vehicles are provided in accordance with the National Planning Policy Framework and <i>Air Quality &amp; Emissions Technical Planning Guidance</i> from the West Yorkshire Low Emissions Strategy Group. A condition requiring charging points is therefore necessary.</p> <p>The times of construction will need to be controlled to prevent a loss of amenity to neighbouring residential properties.</p> <p><b><u>Recommendations</u></b></p> <p><b>STA1 Adequate Provision for Foul Drainage – Before determining the application</b></p> <p>No detailed information has been provided regarding the proposals for providing an adequate system of foul water drainage which will be required by the building regulations. To ensure that it is feasible for the building regulations to be met and also avoid the possible need for a further planning application relating to the construction of a septic tank, it is recommended that before determining the application, the applicant provides detailed information to show how a satisfactory foul drainage system is to be provided for the proposed development. The submitted information needs to demonstrate that the requirements of the Building Regulations 2010 Approved Document H, Drainage and Waste Disposal can be met and if a small sewage treatment plant (i.e. septic tank or package treatment plant) is proposed that the “General binding rules for small sewage discharges” can also be met. The details must therefore include the following information:</p> <ol style="list-style-type: none"> <li>The location of the tank (which must not be so near to any inhabited building as to be liable to become a danger to health or a source of nuisance (a minimum of 7m is required but over 20m and down slope is preferable) or in an area where there is a risk of flooding).</li> </ol> |                                               |                                         |

- b) The discharge details for the tank (which must not present any risk of contamination to any watercourse, underground water or drinking water supply).
- c) Details showing how adequate means of vehicular access will be provided to allow the tank to be periodically emptied and maintained.
- d) Calculations demonstrating that the tank will be of adequate capacity for the highest number of persons that may use the tank.
- e) If an existing tank is to be used, details of its condition / state of repair demonstrating that it is operating correctly and is impermeable to liquids
- f) Details of the necessary porosity and percolation tests carried out to establish the suitability of land that is to be used for any soakaway/land drainage of effluent.

**STA Adequate Provision for Foul Drainage - Footnote**

Specialist advice should be sought for the design and installation of a small sewage treatment system which should meet the relevant standards. These are currently:

- BS EN 12566:2016 - Small wastewater treatment systems for up to 50 PT.
- BS 6297:2007 +A1:2008 - Code of practice for design and installation of drainage fields for use in wastewater treatment

Any discharge from a waste-water treatment system is likely to require a consent from the Environment Agency who may need to be consulted on the application.

**EVC1 Electric Vehicle Charging Points - Condition**

Before the electrical system is installed, a scheme detailing the dedicated facilities that will be provided for charging electric vehicles and other ultra-low emission vehicles shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall meet at least the following minimum standard for numbers and power output:

- A Standard Electric Vehicle Charging point providing a continuous supply of at least 16A (3.5kW) for each residential unit that has a dedicated parking space

Buildings and parking spaces that are to be provided with charging points shall not be brought into use until the charging points are installed and operational. Charging points installed shall be retained thereafter.

**Reason:** In the interest of supporting and encouraging low emission vehicles, in the interest of air quality enhancement, to comply with the aims and objectives of Policies LP20, LP24 and LP47 of the Kirklees Local Plan and Chapters 2, 9 and 15 of the National Planning Policy Framework.

**EVF1 Electric Vehicle Charging Points – Footnote**

A Standard Electric Vehicle Charging Point is one which is capable of providing a continuous supply of at least 16A (3.5kW) and up to 32A (7kW). The higher output is more likely to be futureproof.

Standard charging points for single residential properties that meet the requirements specified in the latest version of “*Minimum technical specification - Electric Vehicle Homecharge Scheme (EVHS)*” by the Office for Low Emission Vehicles will be acceptable. Basically,

charging points that provide Mode 3 charging with a continuous output of least 16A (3.5kW) and have Type 2 socket outlet would be acceptable.

The electrical supply of the final installation should allow the charging equipment to operate at full rated capacity.

The installation must comply with all applicable electrical requirements in force at the time of installation.

#### **CSC1 Construction Site Working Times - Condition**

Noisy construction related activities shall not take place outside the hours of:

- 07.30 to 18.30 hours Mondays to Fridays
- 08.00 to 13.00 hours, Saturdays
- With no noisy activities on Sundays or Public Holidays

**Reason:** To safeguard the amenities of the occupiers of nearby properties in accordance with part 15 of the NPPF and **xxxxxx** of the Local Plan

#### **CSF1 Construction Sites working times – Footnote**

Kirklees Council has powers under Section 60 of the Control of Pollution Act 1974 to control noise from construction sites and may serve a notice imposing requirements on the way in which construction works are to be carried out. It has additional powers under Sections 80 of the Environmental Protection Act 1990 to prevent statutory nuisance including noise, dust, smoke and artificial light and must serve an abatement notice when it is satisfied that a statutory nuisance exists or is likely to occur or recur. Failure to comply with a notice served using the above-mentioned legislation would be an offence for which the maximum fine on summary conviction is unlimited.
