We bought this property because it's in a cul de sac with minimal noise and traffic. We object to houses overlooking our garden invading our privacy and sunlight being blocked out from our garden. We would feel like we are living in a goldfish bowl as currently there are no houses to the rear of our property. The plans look like there will be a house built directly at the bottom of our garden! There would be a bigger volume of traffic going through heaton grange adding to noise and air pollution, also making it unsafe for the children that play out near there houses. There will be added noise during the building work being completed that we just don't want! We strongly object to these houses being built.
