effect on trees and the landscape- The open green space landscape is going to be damaged by the development. effect on the character of an area noise, disturbance and odour- The increased amount of cars is going to negatively impact on the area and the valley with increased emissions and resulting pollution. effect on living conditions - for example the effect on sunlight and daylight, privacy of neighbours and being overlooked effect on neighbouring properties- The existing properties will have their outlook ruined by the development. The disturbance during the development will be significant. I am very concerned that the current road infrastructure will not be sufficient and will have a detrimental effect on the village. 57 homes could mean over 100 children, is there enough capacity in the local schools to cope with this? The average household has two cars so bringing approximately 100 more cars into the village is going to damage the village, valley and the environment.
