---

I understand a planning application as been submitted at 8 well lane dewsbury moor wf13 3sp

my objection is two fold the building work as already commenced before planning as gone through and secondly the reason for planning should not go ahead is numbers 2 to 8 are a block of town houses with a flat roof at the front joining all 4 houses when they built them in 1973 so that water could run off the roof houses 2 and 4 had fall put in the roof for water to run into the spout like wise house 6 and 8 also had fall put in for the same reason only there spout is at the end of number 8 's wall by putting a sloping roof on number 8's part stops the water running away. Theyv'e already done it and now all the water is stuck on number 6 's roof with nowhere to go .

You can see our problem before going ahead they should have sorted out the drainage first not after the horse as bolted.
