The area of which the application has been submitted is a quiet area with very narrow roads and limited access. Building houses and a gym will cause traffic, noise and a build up of cars. Most of the roads around there are to narrow to fit two cars passing for example up Chappards Lane, I believe there will be access to this new development from Dunford Road however this will not stop people trying to get around different ways, I strongly advice against this application due to noise, access/narrow road issues,and disturbing the quiet location that it currently is. 49 dwellings, apartments with a gym and new office space will make this go from a quiet beautiful location to a busy chaos with traffic problems.
