Dear Sir

The origin of this project comes from a complaint about bird droppings. Life in a semi-rural area unavoidably involves minor "problems" such as this. In fact, most of the pigeons involved congregate on the tower block on the main building, not on the chimney involved in this application;

. If the are driven away by preventing them nesting here (which is the aim of the project) this will only result in more pigeons in the area and more droppings. Our main objection, however, is the conservation aspect.

. It would be incredible if our local authority were to give permission for a project aimed at removing an endangered species which is the subject of intensive protection in the rest of the country.

Yours sincerely
