Type of comment: An objection
<p>on the plans, it appears that the conifers are to be removed between our back garden and the land of clough house. this will affect our land as the roots of the trees go under our garden and we know this as we applied to extend and we couldnt dig far enough down due to roots. Removing the trees could disturb our land and the boundary stone wall between.</p> <p>the trees are there and have been for sometime and they are a privacy factor for our property. surely these dont have to be removed they could just be trimmed to make tidy</p>
