<p>The planning application has my full support, the materials used will be of the same style and quality as the original house, and will actually make the house look nicer and more-closely match the other houses in the immediate vicinity, as none of them at this end of the housing development have an inbuilt garage in the same style of the current no 18. Having this adapted to a bay window will make the style match the other numbers in this area.</p> <p>Being the immediate next door to this application, I can confirm there is no infringement towards my property or rights, and that I welcome the modification as per the planning applications submitted.</p>
