

Maintenance Agreement : Avant Homes

LANDSCAPE MANAGEMENT PLAN - OPEN SPACE AREAS, FOOTPATH, RETAINED AND NEW TREES, HEDGES, NATIVE BUFFER, ACOUSTIC BARRIER, BOUNDARY WALL & POST AND RAIL TIMBER FENCE

Development: St Luke's Hospital, Huddersfield, HD4 5RA

Date: 20/11/20 - Rev

INTRODUCTION

This Landscape Management Plan is designed to provide information regarding the long term management of the general amenity areas being retained or created on this development. This document compliments the information provided as part of the tender package including the Detailed Planting Plans and Proposed Layout.

The plan outlines the maintenance principles and objectives and gives a detailed programme for the maintenance of the areas for the lifespan of the development.

The plan covers all aspects of the soft landscaping within the amenity areas to include; retained and newly planted trees, amenity grass areas, native buffer and the acoustic barrier which are not being maintained by the individual plots.

The Landscape Management Plan is a live document and may therefore be subject to review based on the findings of monitoring of the success of initial management.

For Management & Maintenance of the private landscaped areas please refer to the individual plots, deeds of transfer title documents.

OBJECTIVES

The objectives for the Maintenance Plan are:

- To ensure the successful establishment and long-term health of all landscape elements for the benefits of the wider community.
- To allow the residents to understand the expectations of the required management, and to give them a point of contact if required.
- To allow the local authority satisfaction that the area will be managed appropriately.
- To ensure best horticultural and health & safety practices at all times.
- To ensure that methods employed enhance and encourage wildlife, wherever possible.
- To identify defects as soon as possible in order to minimise any damage and rectify at the earliest opportunity.
- To ensure access to the area by all members of the general public and for the area to remain as such permanently.

SERVICE LEVELS AGREEMENT

The Grounds Maintenance & Management teams will:

- Provide service to the development within this plan with two visits per month based on a **13 - 16** day rotation between **March** and **October** and one visit per month between the months of **November** and **February**.
- Ensure that all materials and workmanship is to be of the highest possible standard in accordance with relevant good practice.
- Provide Periodic inspections of paved areas within the POS and report any defects.
- Ensure that all catch-pits and tail-walls are inspected following heavy rainfall and any silt or gravel buildup reported.
- Ensure that all work will be carried out by appropriately skilled and experienced operatives for the specific type of work, especially where Control of Substances Hazardous to Health (COSHH) is applicable.
- Ensure that work is only to be carried out while soil and weather conditions are suitable.
- Provide only machinery and tools suitable for site conditions and the work to be carried out are to be used. Hand tools should be used around trees and in confined areas.
- Ensure that all grass cutting machinery to be well maintained and correctly adjusted to give a clean and even cut. The machinery shall be suitable for the size area to be cut.
- Ensure that all woody cuttings are removed from site.
- Ensure that all Soil, stones and other debris to be removed from hard surfaces and the area left in a clean and tidy condition after maintenance operations are complete.
- Ensure that all litter is to be collected from all soft landscape areas and removed from site.
- Not carry out any burning on site.
- Ensure that all planting areas are to be maintained as weed, pest and disease-free at all times. A proactive approach to weed, pest and disease control is expected with any required measures taken promptly. Any plant losses as a result of weed, pest or disease damage are to be replaced as soon as possible.
- Provide adequate feedings of all grass, plants and trees will take place with an approved slow-release fertiliser.
- Ensure that Chemicals are only to be used where specified and approved.
- Prune all vegetation, as necessary to avoid obstruction of pedestrians or vehicles, security cameras, lighting or visibility-splays.

FOOTPATH

Maintenance objectives:

- To ensure that all areas of hardstanding are free from defects in a clean, tidy and safe condition.
- To manage vegetation growth through preventative measures and routine maintenance and cleansing.

Maintenance requirements:

- Remove all litter, sand, soil, debris, leaf & blossom fall along with any grass cuttings from all footpaths and areas of hardstanding with the public open space by means of thorough hand sweeping or using mechanical air blowers when conditions are appropriate, paying particular attention to areas where litter and other such debris may accumulate.
- Check all footpaths and areas of hardstanding with the public open space during each maintenance visit and report any damage at the earliest opportunity.

GRASSED AREAS - Short Mown Amenity Grass

Maintenance objectives:

- To provide an even and well-maintained appearance and to control weeds.

Management requirements:

- The Grounds Maintenance Team shall use appropriate equipment and machinery driven or operated in a manner appropriate to the task.
- The Grounds Maintenance Team shall ensure that machines and equipment do not damage the sward or its visual appearance.
- Once a cut or treatment has started on a site it shall be complete in one operation.
- Litter, stones and other debris shall be collected immediately prior to cutting or treatment being undertaken, and removed off site.
- The Grounds Maintenance Team shall immediately on completion, or at the end of each working day, clear any cuttings, earth or other debris that lands on surrounding hard surfaces as a result of cutting or treatments to grass areas.
- Every care shall be taken when mowing around trees in grass areas. Where overhanging branches prevents the specified machinery being used grass shall be cut by other appropriate means.
- The Grounds Maintenance Team shall exercise every care in carrying out works around flat and protruding obstacles in grass areas. Heavy or vibrating machinery shall not be driven over manhole and duct covers unless it is obvious they are strong enough to remain

- Grass shall be cut to a consistent height over the specified area. There shall be no tufts or bents left standing above the general sward level.
- Short amenity grassed areas shall be mown to maintain a height between a maximum of 65mm and a minimum of 25 mm. The cutting season is to extend from the first week of March to the last week of October each year, at least every three weeks. During the winter grass shall be maintained at a height of 60 mm.
- Grass shall not be cut in adverse weather and ground conditions. Cutting shall only recommence when it is safe to do so without danger of damaging the sward, surface levels or contours of the ground.
- Where inclement weather conditions delay normal cutting programmes our maintenance contractor will be required to resume work as soon as practically possible and is required to restore works to the specified standard by regular, repeated cutting, as necessary.
- Following delays occasioned by inclement weather where grass length exceeds the maximum specified height the Grounds Maintenance Team shall collect and dispose to tip the arising of the first cut following the delay.
- Where weather conditions inhibit grass growth our Grounds Maintenance Team may vary the minimum height of cut. During prolonged dry weather when grass growth is minimal, ensure all bents, flowers and seed heads are removed by rotary mowers.
- All grass clippings falling on paths, roads and other paved surfaces shall be swept-up and removed before the Grounds Maintenance Team leaves site.
- Where grass areas abut planted areas, hard surfaces, boundary fences, walls, trees or other obstruction the grass shall be trimmed at every third cut and arisings disposed to tip.
- Edges to planting beds and paved areas shall be re-cut with a half-moon tool once, annually to maintain a defined line closely parallel to the edge of the surface. Edges shall be cut vertically to a minimum depth of 50 mm.
- Where damage has occurred to cut edges turf edges shall be repaired and then re-cut to original line. Beds and edge gaps shall not be significantly enlarged by edge cutting.
- Grass abutting existing and new hedges and other plant growth shall be trimmed level with the general sward level by strimming at every third cut. Litter and debris shall be removed from hedge lines.

GRASSED AREAS & NATIVE BUFFER

Maintenance objectives:

- To ensure the creation of suitable conditions for the wildflower seeds to establish without being outcompeted by the grass nurse crop.
- To ensure the correct cutting regime is implemented depending on whether the sward is established in Autumn or Spring.

Management requirements:

Spring Establishment:

- Year 1
- 1st cut to 4-7 cm approx 6 weeks after sowing if sufficient material has established
- 2nd cut to 4-7 cm approx in May (when sward height exceeds 10 cm)
- 3rd cut to 4-7 cm in September/October
- All arisings shall be raked up and removed from site.
- Year 2 (where cutting is carried out)
- 1st cut to 4-7 cm March/April
- Final cut to 4-7 cm end September/October.
- All arisings to be removed from site.

Autumn Establishment:

- Year 1
- 1st cut to 4-7 cm in March (if sufficient material)
- 2nd cut to 4-7 cm in early May
- 3rd cut to 4 cm in September
- All arisings shall be raked up and removed from site.
- Year 2 (where cutting is carried out)
- 1st cut to 4-7 cm March/April
- Final cut to 4-7 cm end September/October.

Years 2/3 to 5

- Subsequent maintenance of wildflower grass areas shall be undertaken to manage grass at different heights to create a diversity of habitats which will enable the colonisation of a range of plant, bird, small mammal, invertebrate and insect life. Alterations to the cutting regime will ultimately be dependent on the sward composition and how the various areas are establishing and being used and will include:
- Cutting in Autumn (end September/October) once grasses and flora has seeded. Removing all arisings from any grass maintenance operations from the grass surface and ensuring that clippings / grassy material do not enter the pond or the overflow channel. Leaving small piles of grass clippings no more than 1500mm x 1500mm x 300mm deep maximum on site in suitable locations within the grass areas to provide suitable habitat for insects and reptiles.

Fertiliser (short mown amenity grass areas only)

- The Grounds Maintenance Team shall supply and evenly spread over the specified areas with an approved distributor, a post-emergent fertiliser. The fertiliser shall be compounded granular free flowing material and shall supply the ratio of plant nutrients N:P:K at 2:1:1 for Spring Dressings and N:P:K at 1:1:1½ for Autumn Dressings. They shall be spread at a rate of 35 gms/m². No fertiliser with the insoluble phosphate representing more than 10% of the total phosphate will be acceptable.

Weedkiller

- The Grounds Maintenance Team shall supply and apply a suitable selective herbicide to grassed areas. The herbicide shall be approved and applied at the rate and in accordance with the manufacturer's instructions. The Grounds Maintenance Team shall only spray during calm conditions, when rain is not imminent and not during drought conditions. Three days shall elapse before recommencement of mowing operations.

Remedial Works

- The Grounds Maintenance Team shall be responsible for remedial works on grassed areas within the contract boundary, disturbed by cultivations, planting or other operations carried out in the execution of their works.
- In Spring and Autumn, the Grounds Maintenance Team shall re-seed any areas which fail to germinate, with approved grass seed mix. Topsoil shall be cultivated and aerated by forking as necessary to tie in with adjacent levels to promote good sward establishment.
- Re-turfing of damaged or bare areas identified by the Grounds Maintenance Team shall comply with all good horticultural practice. The Grounds Maintenance Team shall remove or make up all areas to a level sufficient to take replacement turves. The base of the area will be lightly broken up and levelled prior to final placement of the turf.

HEDGES

Maintenance objectives

- To provide dense, even and defensible boundaries.

Maintenance requirements

- Hedges shall be cut or trimmed as often as required to meet the performance standards according to their type and function. They shall cut outside of bird nesting season; November to January.
- Hedges shall all be 'A' framed to encourage a dense and viable branching, well furnished with healthy tissue / growth that receives full sunlight.
- Hedges shall be regularly maintained to ensure that they do not overhang the footpath, become an obstruction or restrict highway visibility.
- The Grounds Maintenance Team shall use appropriate equipment and machinery driven or operated in the appropriate manner for each task.
- The Grounds Maintenance Team shall ensure that machines and equipment do not damage hedge plants or mar the visual appearance of the hedge.
- Once a cut has been started on an individual hedge it shall be complete in one operation.
- The Grounds Maintenance Team shall immediately on completion, or at the end of each working day, clear all cuttings from the site.
- Cutting shall be with hand held shears or reciprocating hedge cutters and/or secateurs unless otherwise stated.
- Flail cutting shall not be allowed.
- The crown of trees within hedges shall be lifted to a height above the top line of the hedge - To Be Agreed.
- Damaged, diseased, dead and missing plants that create gaps in the hedge lines shall be replaced with new plants of an equivalent size annually - To Be Agreed.
- Hedge bases shall be maintained to prevent other weed growth invading the hedge line.
- Clear hedges and bases of litter and leaves once per month.

LITTER

Maintenance objectives:

- To prevent the accumulation of litter within the open space areas, including the footpaths and areas of hardstanding and play areas.

Management requirements:

- Fly-tipping shall be removed from site within 48 hours of being deposited and/or Trustmgt being notified of the presence of fly tipped materials.
- All litter within the open space areas shall be collected at each grass cutting visit and removed from site.
- Weekly inspections of the POS will be carried out to allow for litter picking and emptying of the bins.

RETAINED TREES

Maintenance objectives:

- To protect the wellbeing of existing trees and to ensure their continued contribution to the aesthetics and ecological benefit of the site.

Maintenance requirements:

- Any works to existing trees shall be carried out in accordance with BS3998:1989 and should be undertaken by competent and experienced tree surgeons. All work shall be undertaken at the appropriate time and checks shall be made with the consent of local planning authority.
- All work shall be carefully carried out to avoid damage to the trees being treated or neighbouring trees. No retained tree shall be used for anchorage or winching purposes.
- All existing trees shall be checked annually for signs of deterioration or distress and the appropriate actions undertaken where required.
- All diseased wood, prunings and rubbish should be removed from the site.
- Heavy branches shall be removed in sections and undercut to avoid tearing the bark, and thereafter lowered by slings. No branch stumps should be left and cuts should be sealed with fungicidal sealant. No cuts should be capable of holding water.
- Weed control by hand to ensure area to base of each plant is weed free. Check stakes and guards are not suppressing growth and remove by the end of year 5. Replace any dead / dying stock in winter.

NEWLY PLANTED TREES

Maintenance Objectives:

- Standard trees shall be encouraged to develop as upright, healthy individuals with well formed, balanced crowns. Side growth shall be removed and lower crown lifting undertaken to ensure minimum branch clearances above ground level of at least 2 · 5m.

Maintenance Requirements:

- The Grounds Maintenance Team shall check stakes and ties at each grass cutting visit, and adjusted/ replaced as necessary.
- Maintain a 600mm diameter grass and weed-free area at the base of each tree with in the POS areas by hand weeding or careful use of glyphosate.
- Cut-back any damaged bark and treat the wound(s) with fungicidal sealant.
- Ensure that sufficient water is applied to maintain healthy growth. Carry-out using a fine rose or sprinkler until full depth of topsoil is saturated. Allow for watering as necessary, the Grounds Maintenance Team to be responsible for deciding frequency of water. It is expected that watering of standard trees will still be necessary during the first 2 years of the plan period.
- All stakes and ties shall be removed when appropriate.
- During March/April, 70 g per tree of slow release fertiliser shall be applied if appropriate.
- During years 1-5, any dead, dying, diseased or lost tree shall be replaced on a like-for like basis as appropriate
- After year 5, any dead, dying, diseased or lost tree shall be replaced with a standard tree of the same species.

NATIVE PLANTING

Maintenance objectives:

- To develop and maintain a healthy block of native plants with a variety of heights, densities and wildlife benefits while providing screening of adjacent residential housing.

Management requirements, general:

- All damage caused in gaining access and in maintaining this area shall be made good by the Grounds Maintenance Team.
- Maintain a gap of at least 0.5m between the closest vegetation and any fences or buildings.
- Maintain a 500mm diameter grass and weed-free area around the base of each plant until the canopy closes.
- Apply systemic herbicide for the whole planted area and alongside all residential fences and buildings at the end of May, again in July and again in late August, using a knapsack, and guarded-spray.
- Remove any noxious weeds, such as Thistle, Bramble, Ragwort, Dock, etc.

- Remove all guards between years 3-5 after planting.
- Replace any dead, dying, diseased or badly damaged plants on a like-for-like basis during years 1-5 after planting. Thereafter, replace as necessary to maintain full cover.
- Strim under fence areas on a monthly basis between May and October, and check area for noxious weeds, (as mentioned above) and any self-set aggressive tree species.
- Apply suitable fertiliser at year two and year five, according to manufacturer's instructions.

ACOUSTIC FENCE, BOUNDARY WALL & POST AND RAIL TIMBER FENCE

Maintenance objectives:

- To ensure all fencing structures remain serviceable for the lifetime of the development.

Management requirements:

It is anticipated that no major maintenance will be required for at least 20 years, particularly if the routine management requirements below are applied;

- Inspect the support Posts Panels and Structures every quarter for signs of wear & tear and damage.
- Routine maintenance will include checking/tightening of joints & fixings, painting & treatment of metal surfaces and periodic maintenance of planting.
- Defects that may represent an immediate or imminent hazard will be made safe at the time of inspection, with permanent repairs undertaken within 28 days.
- All scheduled maintenance to take place outside of the nesting / growing season to minimise disruption to wildlife.
- Any graffiti identified during the inspection process will be removed during the next scheduled maintenance visit.

MANAGEMENT PROPOSALS REVIEW & MAINTENANCE SCHEDULE

The sequence of agreement, monitoring & review is set out below. It is envisaged that at each stage agreement will be reached between the Developer, Management Company and Local Authority. The stages of agreement, monitoring and review are set out below:

- Management proposals and annual maintenance schedules to be agreed by all parties involved (including the Local Authority) in the on-going management of the POS areas & associated features specific to this plan.
- The Developer, Management Company and Local Authority shall meet on site annually for the lifespan of the development to review the condition of the open spaces.
- Any adjustments to the management objectives, operations & frequencies of visits are to be agreed in writing between the Developer, Management Company and Local Authority.
- Routine monitoring visits and amendments to the plan will be continuous for the lifespan of the development;

General Maintenance Schedule

[illegible]

Retained Trees Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the retained trees within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11 +
Tree inspections / checks to monitor the health / condition of the individual trees and undertake any remedial pruning required. Particular attention to be paid to trees adjacent to activity areas / footpaths or areas where accessibility of the public may introduce health & safety concerns.		Sept - Oct & after significant storm events.	X	X	X	X	X	X	X	X	X	X	X
Removal of debris trapped in branches		As Required	X	X	X	X	X	X	X	X	X	X	X
Remedial pruning to trees - deadwood, crown clean, crown lift - as required.		Oct - March & after significant storm events.	X	X	X	X	X	X	X	X	X	X	X

From Year 11 onwards, the condition of the trees shall be reviewed annually, in perpetuity for the lifespan of the development;

New Tree Planting Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the newly planted trees within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11 +
Stakes, ties & tree guards to be checked regularly during establishment phase an loosened, tightened, or replaced as required (all stakes & ties will be removed when appropriate)	To ensure trees/ shrubs become successfully established	Each Visit	X	X	X	X	X						
Ensure sufficient water is applied to all new trees, particularly during establishment.	To maintain healthy growth, particularly after excessive dry weather	N/A	X	X									
Maintain a grass & weed free area at the base of each tree	To promote & maintain health growth	Each Visit	X	X	X	X	X	X	X	X	X	X	X
Undertake formative pruning of young trees to encourage good growth & shape.	To promote & maintain health growth	Annually	X	X	X								
Slow release fertiliser;	To promote & maintain health growth	March/ April	X	X	X	X	X						
Replace, on a like for like basis any dead, dying, diseased or lost tree during years 1 - 5.	N/A	As req.	X	X	X	X	X						
After 5 years, dead, dying diseased or lost trees shall be replaced with a standard tree of the same species	N/A	As req.						X	X	X	X	X	X
Within areas that have public access, tree conditions will be reviewed annually to ensure no risk from public from damaged / dead trees.	Reasons of public health and safety	Annually		X	X	X	X	X	X	X	X	X	X

From Year 11 onwards, the condition of the trees shall be reviewed annually, in perpetuity for the lifespan of the development:

Native Planting Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the native shrub planting within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Tidy up planting areas, removing rubbish & litter from planting beds	To ensure the planting beds have the best possible chance of establishing.	Each Visit.	X	X	X	X	X	X	X	X	X	X	X
Water newly planted beds, particularly following excessive dry weather.	To ensure survival during establishment period.	Summer/ Annually	X	X									
Dead head flowering shrubs after flowering periods	To maximise opportunities for newly planted beds to become established.	As req. July - Sept	X	X	X	X	X	X	X	X	X	X	X
Maintain a grass & weed free area around the base of each plant until the canopy closes.	To promote & maintain health growth	Each Visit.	X	X	X	X	X	X	X	X	X	X	X
Remove any dead plant materials at the end of each growing season.	To promote & maintain health growth	As req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Damaged, diseased, dead & missing plants to be replaced with new of equivalent size.	To promote & maintain health growth	Annually as req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Apply suitable fertiliser inline with manufacturers instructions.	To promote & maintain health growth	Annual as req.		X			X			X			X

Cutting required from Year 11 onwards will be undertaken in the winter months, in perpetuity for the lifespan of the development.

Short Mown Amenity Grass Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the short mown amenity grass within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Growing Season; To maintain the amenity grass at a height between 65mm & 25mm, trim to re-form the edges.	Maintain a close packed sward.	Each Visit / Fortnightly March to Oct	X	X	X	X	X	X	X	X	X	X	X
Dormant Season; To maintain amenity grass at a height of 60mm, trim to re-from edges.	Maintain a close packed sward.	As req. Nove to Feb	X	X	X	X	X	X	X	X	X	X	X
Hard surfaces will be swept to remove grass clippings following each cut.	Maintain a close packed sward.	Each Visit / Fortnightly	X	X	X	X	X	X	X	X	X	X	X
Supply & apply selective herbicide to manufacturers instructions; to all grassed areas	Maintain a close packed sward.	Annually as req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Over-seed patchy areas; as required.	Maintain a close packed sward.	As req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Edging to planting beds & paved areas shall be re-cut once annually.	To maintain a defined line; to a depth of 50mm	Annually as req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Grass abutting new & existing hedges or planting beds to be trimmed level with the general sward height; every third cut.	To maintain a defined line & height;	As req.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards, in perpetuity for the lifespan of the development;

Wildflower Meadow Grass & Native Buffer Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the wildflower grassland within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Maintain the wildflower grass at a height between 40mm & 70mm; two annual cuts	To enhance the floral biodiversity of the grassland habitat..	First cut; March - April Second cut; Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Arisings to be left for a maximum of 1 week after cutting before being removed from site.	To allowed to drop and to provide a refuge for amphibians.	Each Visit / Fortnightly	X	X	X	X	X	X	X	X	X	X	X
Supply & apply selective herbicide to manufactures instructions.	To enhance the floral biodiversity of the grassland habitat.	Annually as req. Sept - Oct.		X			X			X			X
Over-seed patchy areas; as required.	Maintain a close packed sward.	As req. Spring - Autumn.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards, in perpetuity for the lifespan of the development;

Hedgerow Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the hedgerow within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Implementation of standard aftercare management, to include replacement of any losses and cutting of half the height of the hedgerow soon after planting.	To ensure hedgerows become successfully established	As required, avoid cutting during bird nesting season (March - September inclusive)	X	X	X	X	X						
Water newly planted hedgerow sections, particularly following excessive dry weather.	To ensure survival during establishment period.	Summer/ Annually	X	X									
During establishment phase (first five years after planting), adjacent grassland vegetation will be trimmed / cut back	To maximise opportunities for newly planted sections to become established.	As req.	X	X	X	X	X						
Undertaking cutting & pruning (usually 50% of each side trimmed annually)	To enhance the biodiversity of the hedgerows.	Annually	X	X	X	X	X	X	X	X	X	X	X
Infill as required any gaps.	To maintain the integrity of the hedgerows	As req.	X	X	X	X	X	X	X	X	X	X	X
Tidy up hedges & bases removing rubbish, litter and leaves.	To promote & maintain health growth	Each Visit	X	X	X	X	X	X	X	X	X	X	X
Remove any dead plant materials at the end of each growing season.	To promote & maintain health growth	As req. Sept /Oct						X	X	X	X	X	X

From Year 11 onwards, the condition of the hedgerows shall be reviewed annually, in perpetuity for the lifespan of the development;

Monitoring

Feature	Monitoring	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Trees	To be monitored during each visit to check tree health & identify any dead, dying, damaged or potentially dangerous trees.	N/A	X	X	X	X	X	X	X	X	X	X	X
Hedgerows	To monitor the condition of the hedges and how they change with the management strategy.	May	X	X	X	X	X	X	X	X	X	X	X
Fencing & Boundary Structures	Visual inspections carried out to all structures on all planned visits with maintenance repairs carried out as required	N/A	X	X	X	X	X	X	X	X	X	X	X

Routine monitoring visits and amendments to the plan will be continuous, in perpetuity for the lifespan of the development;
