We suffer from flooding from surface water coming from the field to be used for this planning application. It has got worse since there is no market gardening in the field. We have a pump to drain the flood water. We are concerned that when the houses are built there will be no mains drainage if no pumps are installed. We need to see what type of fencing and exactly where on the east side adjoining our garden will be planned. We do not want any damage to trees such as magnolias, camellias, acers etc in our garden. Whilst the planning application has reduced the number of houses on the plot from six to five. We still feel the number is too many for such a small site.
