Further to my previous correspondence, I notice on drawing 6 there is an opening window facing on to my garden. This should have obscure glass and should be a non-opening window to preserve my privacy when using my garden. Deliveries to the site should be kept to a minimum as should onsite materials. All waste should be removed promptly and if a skip is used this should be sited away from my house. No dirty water eg - from the washing of tools (cement mixers, plastering equipment etc) to be allowed to contaminate my garden or flow into the sewer. Any damage caused to my garden (Fabric, structures, or plants etc) should be restored at the end of the project regards
