I wish to object to converting the Shoulder of Mutton public house into a dwelling as it is a vital part of the community. Somewhere the local community can meet up , a place that families can take there children and interact with others , a great place to meet people visiting or just passing through which brings a great sense of pride and community . Losing a community hub like the pub would be terrible for the village , over the years we have lost our village hall to development and now the public house is under threat, we need to maintain the sense of community and it also gives a feeling economic energy especially with the passing trade of the walking/ rambling trade .
