I have been a member of the archery club for more than 5 years. being retired it is the one avenue I have for recreational pursuit, whether individually or in a group. I have found the club of great benefit for my mental health and well being during the summer. However during winter. when the days are shorter, apart from times when the weather is kind, I cannot take advantage of this outlet. The provision of an indoor shooting area will greatly improve the well being of many of the members who are retired and perhaps otherwise limited in their exercise and social opportunities. Whilst appreciating this is green belt, the site has already been developed in a sympathetic manner. Further or combined development blended into the environment. similar to farm buildings that are close, will have little or no impact. It is easy to say No, but the benefit to the community, especially the elder members, of this sympathetic development, will have direct effect on the welfare of all concerned.
