I feel that the benefit to the members of the archery club will be significant if the planning permission was granted. Allowing the club to continue functioning in cases of poor weather, especially in the winter would be a massive step forward for the club. Personally it would also mean that I do not have to shoot at another club over the winter months. It also provides more opportunities for archery coaching and beginners courses to take place when otherwise they may not be possible. This widens the scope of what is possible within the club but also potentially increases club funding ensuring the continuation of the club for years to come. Another building on the site is obviously a concern for planners but I don't feel personally that it would be out of place considering the existing containers and club house already sited within the club grounds.
