Type of comment: An objection
<p>I write with reference to the proposed land redevelopment of the North Bierley Waste Water Treatment Works with concerns over the considerable increase in traffic volumes on inadequate roads to support these vehicles. I have a specific concern over the implications for the local community should this development proceed as planned. I believe that it is wholly unsatisfactory and reckless for developers to disregard the safety implications of such huge increases in traffic volumes, including significant numbers of heavy goods vehicles, solely on the basis of the financial implications of alternative, safer, options. If the increased traffic volumes were brought safely onto and off of the site onto the local motorway network without jeopardising the safety of residents and the primary school community then I would be supportive of the scheme. The benefits to the local economy through job creation & increased spending in surrounding business establishments would possibly be supported by many, but not at the risk of endangering the safety of the very community that the proposal most affects. I implore you to ensure that safety of the community is paramount when considering whether this application, in it's current form, is viable.</p>
