Berry****Responding Ref: 6-7-6**

This application seeks approval to the erection of an agricultural building at Lower Park Farm, Park Lane, Berry Brow, Huddersfield.

The proposal is to erect an agricultural steel framed building which will be used to house machinery, cattle and produce. The building will be located behind the existing agricultural buildings which were granted planning approval in 2016 - application number 2016/90680.

The proposed building will share the existing access from Park Lane into the site.

Given the proposed agricultural use it is not considered that this proposal will result in any significant increase in traffic and Highways Development Management have therefore no objection to these proposals.
