My objection to this application is based on access and parking. The access to this plot is up a short concreted lane where currently vans and cars are parked. There are also cars parked opposite the entrance to this lane. Spencer Street is currently almost gridlocked with cars and vans parked on the road and the pavement and I feel that more housing on the street will only aggravate the situation. It is currently difficult to walk the length of Spencer Street on the pavement, particularly with small children and/or pushchairs. I notice there are two parking places assigned as part of the application however cars tend to end up parked on the street and designated parking places used for other means. There is also the concern that should this application be approved then the rest of the land behind this row of houses, from No 2 to No 12, will also apply for planning which will mean another 5 houses with accompanying vehicles and very poor access.
