As the development has already been carried out it is possible to accurately evaluate its impact on the surrounding area. The impact on highway safety immediately became clear due to the proximity of the gates to Riley Lane which does not afford sufficient room to all but the smallest of vehicles to pull off the highway before being blocked access to Netherfield Close. This has resulted in vehicles either "sticking out" into the highway or simply pulling up at the side of the road and parking over the "Keep Clear" markings making it difficult for large vehicles to pass safely. This situation already presents a dangerous hazard but it will become even more dangerous, not to mention totally unworkable, when the development of a further property and associated access is completed at No.9 Riley Lane which is directly opposite the new gates. The only safe course of action is to remove the gates immediately and consider whether they could be installed further along Netherfield Close so that vehicles have room to pull off the main highway completely.
