Hi Nick

Thanks very much for your speedy response and the advice therein which I am more than happy to accept.

I assume that it is sufficient for me to merely confirm by this email that I wish the notification to be amended to include 'pruning to give 3m. ground clearance along the access route shown as necessary and removal of a small group of young trees from the route near to where it leaves the surfaced track.'

If the request needs to be submitted in a more formal way, then please let me know.

I am pleased to note that you expect to be able to quickly issue the formal decision.

Thanks once again

Malcolm.

Subject: Tree Work Application 2021/90553

Hi Malcolm

I've been out to Low Westwood Mill and looked at the notification you've sent in. I can record no objection to the works however having walked the access route I think some additional works will be needed for a tractor/trailer to get in. To that end I've marked a blue line on the attached to show the optimum route to get to the area of work. I noted that there was a group of small young trees close to the building which are not marked on the topo however are just big enough to need Conservation Area consent. There are also a few low branches which may obstruct the access for a tractor.

I would therefore suggest to amend the notification to add the following work, pruning to give 3m ground clearance along the access route shown as necessary and removal of a small group of young trees from the route near to where it leaves the surfaced track.

If you are happy with this modification I will add the attached plan and the above description to the application. As we have had no objection or comments I will be able to proceed to issue a decision quickly. If you want to discuss the recommended changes, let me know and I can give you a ring.

Kind regards

Nick Goddard
