Subject: Re: 2021/90711 Objection to Retrospective Planning Travellers Rest - 2021/90711

Good morning Hannah

I have just had a look at the proposal drawings for the over flow car park at the travellers rest and they do not actually truly reflect the size of the proposed car park. They show, in red, the original car park and not the proposed extension to the car park. Therefore this application is not factually a true reflection of the proposal So I don't believe the application is a true reflection of the proposal.

Would you mind adding this statement to our objection.

Many thanks
