---

Hi Mr. Harrison,

You will do doubt by now be fed up of reading emails from me concerning the property adjacent to me at #4 Elm Court and the proposed building works under application 2021/90967 but here goes.

I am that I hope demonstrate how  
moving the garage as suggested in the above noted plans would adversely impact on the outlook and privacy of my property and severely restrict the amount of available light.  
the current siting of the garage at #4 viewed from the pathway down  
the side of my property which is just 1.45M wide.  
view down the (wider) drive at #4 Elm Court  
demonstrates which three of my windows will be affected and how close to my property the proposed garage outer wall will be. Quite intimidating.  
the current garage siting showing that, if moved, the available  
space for a door in any new garage is very limited widthwise.

Two other points. May I reiterate the comment made in my last note to you indicating that an attached garage may not be built within 1M of any boundary. Surely, this precludes the proposed build proceeding?

Further, I have not seen any local notices posted regarding this proposed build. Does this remain a requirement or has it been "shelved" due to Covid issues?

I would naturally be pleased to discuss all this with you in person if this is permitted and considered appropriate. If you think this might be a constructive way forward please call me on to make arrangements either for a site visit or for me to call at your  
offices

Best regards,
