

Highfield

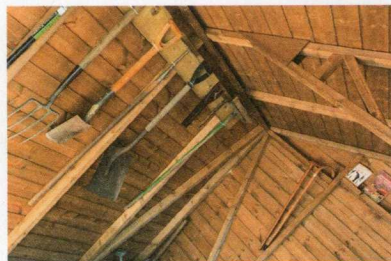

The shed of sheds

Whether you need a secure place to store your mountain bikes, work your lathe, or perfect that homebrew, the Highfield is a practical, versatile cabin designed for doers.

We like to think of the Highfield as the most robust, reliable garden shed you will ever own. As a result, the ordering process is equally no-nonsense. Pick the right size for you, position the fully boarded door and window(s) in the cabin front, select an appropriate roof style, and away you go.

Constructed from 45mm solid interlocking timber with insurance grade doors and locks, the range of premium Highfield garden buildings are substantial and secure and are sure to offer many years of flexible service.

Robust workshop, hobby room or serious storage

Two roof styles to choose from

Simple off-the-peg sizing and pricing
