Subject: Re: Tree Work Application 2021/91033

Good morning Nick,

Following a conversation with my tree surgeon yesterday evening, he advised that we should reduce the height of the sycamores by 15% to address the issues being caused to neighbours with overhanging branches and the casting of shadowed cover to their properties. This work would have minimal consequence to the trees, would not impact on the overall appearance of them but would eliminate the issues described above and we would still have two substantial sycamores in place.

We hope this meets with your approval and provides you with the appropriate information to allow this work to be carried out.

Yours sincerely,
