This property overlooks my garden and house. The Addition of dormer windows will elevate the property leading to reduced privacy for me. When the sun is low reduced sunlight will hit my house and garden. Added to this large dormers will be out of character given the history of the area. These houses are for family usage not flats for what will be single occupancy. In the past we have experience any social behaviour, petty crime, including when one of these houses was used to The is a conservation area so such changes will be out of character. I have no objection to the bike shed.
